

Introducing BigFuture School

Free mobile app that gives students control over their college and career planning. Available to students who take certain in-school assessments, it sparks their interest in planning the moment they get their scores.

The Power to Plan—in the Palm of Students' Hands

BigFuture® School provides students with the power to:

- View scores from the **PSAT/NMSQT®**, **PSAT 10™**, and **SAT® School Day**
- Explore customized college and career planning guidance
- Hear from nonprofit colleges, scholarship providers, and government agency education programs through Connections™ (when available)

BigFuture School and Connections put students' privacy first. No personal information is shared with any institution unless a student chooses to share information directly with them.

Visibility to Your Students' Actions

In the K-12 Score Reporting Portal, educators can view reports on:

- Students with access to the app and a list of who is using it
- Students who opted in to Connections and a list of which students viewed their messages
- List of organizations that have reached out to your students

HOW IT WORKS

Remind students to provide a mobile number

During the exam setup, students can provide a mobile number that is only used to access and authenticate the app.

Encourage students to check their scores in the app:

Students can view their scores, including career insights, to jumpstart their college and career exploration.

Students who don't provide a number or don't download the app can receive their PDF score report from schools or log in to their College Board account.
